TIMOTHY ITAYI

PROFESSIONAL SUMMARY

Hello everyone ,

Hi there, my name is Tim and I'm a highly collaborative and passionate full-stack developer. I thrive on solving complex problems and working in a team environment to create exceptional products.

At Dev Academy Aotearoa, I gained experience with a variety of cutting-edge technologies, including Javascript, Typescript, React, Redux, SQLite, Superagent, Jest, CSS, and Tailwind. I'm a quick learner and always eager to upskill with new technologies to ensure that I'm always at the forefront of industry trends.

Skills

- Adaptability
- CSS
- Git
- HTML5
- jQuery
- TypeScript

PROJECTS

Waitless at Front-end Developer, Auckland
April 2023

During my week-long project working as the front-end developer on the Thai restaurant app Waitless, I developed a range of valuable skills through collaborating with my peers in a small group setting. These skills include teamwork, time management, communication, agile development, and problem-solving.

Regular communication with team members and stakeholders helped to share updates, resolve issues, and ensure that everyone was on the same page.

I also worked collaboratively with the team to solve technical problems, brainstorm solutions, and ensure that the app was delivered as expected.

Throughout the project, we used a variety of cutting-edge technologies, including React, Redux, CSS, and Tailwind to bring the app to life.

!music at Back-end Developer, Auckland
April 2023

As the back-end developer for the Friday group project !music, I collaborated with a small team to build the project within a tight 2-day deadline. This experience helped me learn valuable skills such as teamwork, time management, communication, and problem-solving. Additionally, utilizing a variety of cutting-edge technologies, including Typescript, React, Redux, SQLite, Superagent, Jest, and CSS, helped me broaden my skillset and stay up-to-date with the latest trends in web development. Overall, this project provided an excellent opportunity to work in a compressed timeline and in a small group environment, which are both essential skills in the web development industry.

EDUCATION

Dev Academy Aotearoa, Auckland
February 2023 — May 2023

As a graduate of Dev Academy, I am proud of the technical skills and knowledge that I have gained. Throughout the program, I learned programming languages such as JavaScript, HTML/CSS, and various frameworks and libraries such as React and Node.js. I also gained experience in pair programming, Agile methodologies, and version control using Git.

But beyond technical skills, Dev Academy also emphasized the importance of human skills such as communication, teamwork, and problem-solving. These skills are essential in any tech career and I feel equipped to work collaboratively with others to achieve common goals.

Skills: Planning · HTML5 · JavaScript · Express.js · React.js · Redux.js · Test-Driven Development · Tailwind CSS · TypeScript · Problem Solving · Software Development
